Assignment 6

Choosing an appropriate UI

A. Selected UI Type: *Direct Manipulation Interface (GUI)*

B. Why GUI for AssistX?

- User demographics analysis

C. Detailed Justification:

1. **Ease of Use** - Point-and-click vs command memorization
2. **Error Prevention** - Visual validation
3. **Efficiency** - Task completion analysis
4. **Visual Feedback** - Real-time indicators
5. **Multi-Device Support** - Responsive design
6. **User Expectations** - Industry standards
7. **Cost-Benefit** - ROI analysis

D. Specific GUI Components:

- Landing page, forms, dashboard, query interface, admin panel

E. Why Alternatives Rejected:

- Command-line (too technical)
- Menu-based (too restrictive)
- Voice interface (accuracy issues)
- Form fill-in (too rigid)

F. GUI Design Principles:

- Consistency, feedback, simplicity, visibility, error prevention

G. Future Extensibility:

- Easy to add features
